Priority

1. ☒ This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:
- ☒ copy of the earlier application whose priority has been claimed (Rule 66.7(a)).
- ☐ translation of the earlier application whose priority has been claimed (Rule 66.7(b)).
2. ☐ This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.
3. Additional observations, if necessary:

1. Novelty (PCT Article 33(2))

The present independent claim 1 discloses (meth)acrylic
acid esters of alkoxyated unsaturated polyol ethers

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

containing at least three ethylenically unsaturated groups. This subject matter is not anticipated by any of the citations and thus is novel.

2. Inventive Step (PCT Article 33(3))

The closest prior is the citation D2, which differs from the subject of the application solely in the minimum number of three ethylenically unsaturated groups.

However, there is nothing to indicate, nor was it stated, that the aforesaid distinguishing feature entails any special or unexpected effect.

The objective technical problem addressed by the present application is thus the preparation of alternative meth(acrylic) acid esters of alkoxyated unsaturated polyol ethers.

Each of documents D3 to D8 discloses clear-cut suggestions toward a solution of this problem by means of the aforesaid distinguishing technical feature (for the relevant passages cf. the international search report). Thus, before the priority date of the present application, a person skilled in the art had no problem, based on normal competence and expertise, in solving the above-cited objective problem by combining the indicated citations D2 or D3 to D8.

Consequently, the subject matter of the present application does not involve an inventive step in relation to a combination of documents D2 or D3 to D8.
